

ASEN 5012: Mechanics of Aerospace Structures

Fall 2019

Class meetings: MWF 3:30 { 4:20 PM in AERO 114

Instructor:

Kurt Maute

E-mail: maute@colorado.edu

Office hours: Th 3:00 { 4:00 in AERO 303*

Teaching Assistant:

Mohammad Mokhtarzadeh Khanegahi

E-mail: momo1035@colorado.edu

Office hours: F 1:00 { 2:00 in AERO 303*

* unless otherwise announced in class or via CANVAS announcements.

Prerequisite:

ASEN: APPM 2360 and ASEN 2001, 2003, and 3112, or equivalent

2.

Grading:

Homework (20%) , two mid-term exams (20%+20%), and an in-class final exam (40%). The homework assignment with the lowest score will be dropped. If the score of any of the two midterm exams is lower than the score of the final exam, the midterm is dropped, and the weighting of the final is increased from 40% to 60% (or 80% if both midterms score lower than the final).

No make-up homework assignments and make-up exams will be offered. If a student does not turn in a homework assignment (in time) or does not take an exam, a zero score will be assigned. Please, see policy on grading homework assignments and exams. A make-up final will be offered if the student provides a valid justification for missing the final.

Groups of up to three students can work together on homework assignments. Homework will be graded partially for completeness and partially for correctness, i.e. only a randomly chosen subset of questions will be graded for technical correctness and presentation; solutions for all homework problems will be posted.

Notes:

All communication outside the class room will be done via the course Canvas website and email. It is the student's responsibility to check regularly for updates to the Canvas website. It is strongly recommended to activate the option in Canvas to receive automatic notifications whenever the course website is updated.

- (a) Classification of materials
- (b) General Hooke's law
- (c) Concept of hyperelasticity

4. Conservation Laws

- (a) Material derivatives
- (b) Equations of continuity
- (c) Equations of motion

5. Linear Elasticity

- (a) Governing equations and uniqueness of boundary value problems
- (b) Plane stress and plane strain models
- (c) Saint Venant's theory of torsion
- (d) Airy stress function in Cartesian coordinates

6.

semester so that I may make appropriate changes to my records. For more information, see the policies on classroom behavior and the Student Code of Conduct.

Policy Regarding University Honor Code - All students enrolled in a University of Colorado Boulder course are responsible for knowing and adhering to the Honor Code. Violations of the policy may include: plagiarism, cheating, fabrication, lying, bribery, threat, unauthorized access to academic materials, clicker fraud, submitting the same or similar work in more than one course without permission from all course instructors involved, and aiding academic dishonesty. All incidents of academic misconduct will be reported to the Honor Code (honor@colorado.edu); 303-492-5550). Students who are found responsible for violating the academic integrity policy will be subject to nonacademic sanctions from the Honor Code as well as academic sanctions from the faculty member. Additional information regarding the Honor Code academic integrity policy can be found at the Honor Code Office website.

Sexual Misconduct, Discrimination, Harassment and/or Related Retaliation - The University of Colorado Boulder (CU Boulder) is committed to fostering a positive and welcoming learning, working, and living environment. CU Boulder will not tolerate acts of sexual misconduct intimate partner abuse (including dating or domestic violence), stalking, protected-class discrimination or harassment by members of our community. Individuals who believe they have been subject to misconduct or retaliatory actions for reporting a concern should contact the Office of Institutional Equity and Compliance (OIEC) at 303-492-2127 or cureport@colorado.edu. Information about the OIEC, university policies, anonymous reporting, and the campus resources can be found on the OIEC website. Please know that faculty and instructors have a responsibility to inform OIEC when made aware of incidents of sexual misconduct, discrimination, harassment and/or related retaliation, to ensure that individuals impacted receive information about options for reporting and support resources.

Policy Regarding Religious Observance - Campus policy regarding religious observances requires that faculty make every effort to deal reasonably and fairly with all students who, because of religious obligations, have conflicts with scheduled exams, assignments or required attendance. In this class, students must
