Objectives of the course'

Since the 1980's, Economic Growth has emerged as an independent area of active field of research within economics. The aim of this course is to synthesize recent ideas and approaches to understanding economic growth at the undergraduate level, and to survey the leading explanations for the causes of growth. This course is organized into three substantive sections. she

of factor accumulation. "In the second part of the course, we study of the role of nd technology in explaining income differences. The third section explores the deeper or characteristics of countries that may underlie differences in factor accumulation and mong countries. We will supplement textbook material with articles about the economic ntry experiences."
